SUMMARY

Software developer with the ability to design, develop, and deliver high-quality websites and programs. Skilled in problem-solving and adapting to new technologies, with a strong foundation in modern web development practices. Known for attention to detail and a passion for learning.

EXPERIENCE

Software Developer - SyManSys Technologies, Delhi, India May 2022 - Aug 2023

- Developed web applications using JavaScript, PHP, React, Node.js, and Express.js.
- Managed database operations with MySQL and MongoDB.
- Participated in code reviews, testing using Jest, and deployment on AWS using Jenkins.
- Worked closely with team members to create effective solutions.

Web Developer / Team Lead - Ottawa Therapy Dogs, Ottawa ON Jan 2024 - April 2024

- Designed and developed a website for Ottawa Therapy Dogs.
- Led a team of three members, delegating tasks effectively and encouraging collaboration.
- Implemented search engine optimization (SEO) to improve the website's visibility on search engines.
- Integrated responsive design principles to ensure seamless functionality across devices.

Search Engine Optimization (SEO) - Finnobi Forrest, Ottawa ON April 2024 - May 2024

- Conducted keyword research and analysis to identify high-performing and relevant search terms.
- Optimized website content, metadata, and structure to improve search engine rankings.
- Analyzed website performance using tools like Google Search Console and SEMRush.
- Implemented local SEO strategies, including optimizing Google My Business profiles.

PROJECTS

Security Inspection Dashboard Jan 2025

- Developed a safety inspection dashboard with a centralized database and input form.
- Created an SQL database to ensure organized data management.
- Designed a user-friendly form for seamless data collection on mobile and desktop devices.
- Integrated the solution with Microsoft 365 to support scalable growth and existing infrastructure.
